Women Kick Butt - Final Testing

Group 8: Camryn Tippetts, Ava Garff, Katie-J Smithson, Rachel Pankey, McKenna Sork, Lauren Marriott
EXDM 404 - Mat Duerden
12/6/2021

Empathize

The first step in the design process, empathize, requires individuals to consider other perspectives in order to provide inclusive designs. In the first round of testing, our group began to empathize by identifying needs we had experienced or observed. We interviewed peers using phone calls, text messages, and Instagram polls which targeted a wide demographic in order to identify common pain points. These interviews allowed us to narrow our focus to a single problem: the gym experience.

The need to be confident while exercising is particularly prevalent with college aged females. A common goal is to be physically active, but individuals often struggle to do so because they are intimidated by the knowledge and effort that is required. This issue, known as "gym intimidation," occurs when individuals do not know how to use equipment or to create a realistic workout routine. People often become discouraged and do not know what resources are available. We found that a lack of confidence was directly related to a lack of knowledge about exercise equipment. Our first test was designed to resolve these concerns.

After initial testing, our team collected feedback from the class using Google Forms. In the survey, 69% of respondents reported that the Women Kick Butt (WKB) exercise experience had a positive impact on their confidence throughout their workout, demonstrating that our test was effective in improving comfort and confidence as desired. However, many responses also identified areas we could improve with our design. These responses became our empathy data for the final round as we discovered new opportunities to address the needs of participants.

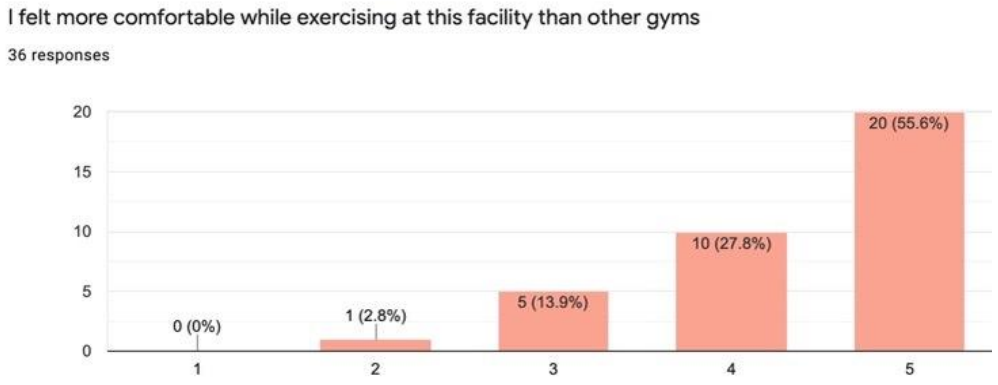
After reviewing the responses from initial testing, our team identified three needs to address in the next round: clarity, functionality, and inclusion. The first need, clarity, was identified in the Google Form when 80% of respondents reported that they had received adequate instruction, while the other 20% were confused about the expectations. In the final survey

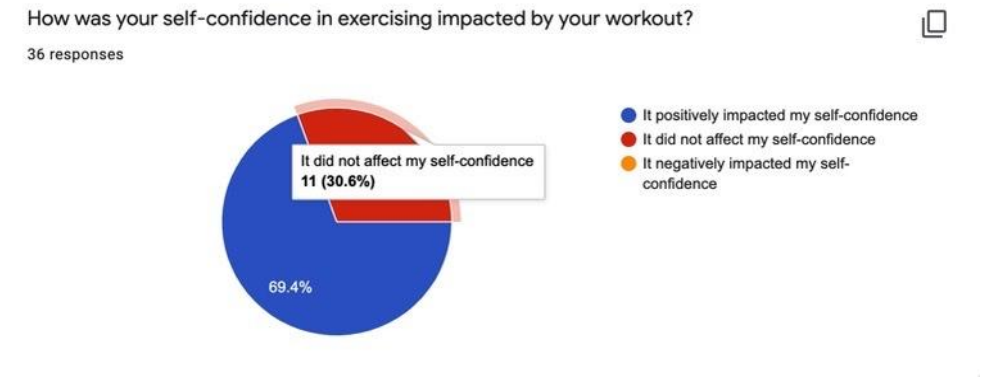
question, a respondent stated “we need more workout training videos” because the self-guided exercises were difficult to follow. The individuals did not know when to start their workout, or when they were expected to switch rooms. This confusion occurred because the instructions and resources were unclear. Customers also had difficulty identifying trainers out of the crowd, making it impossible to ask questions.

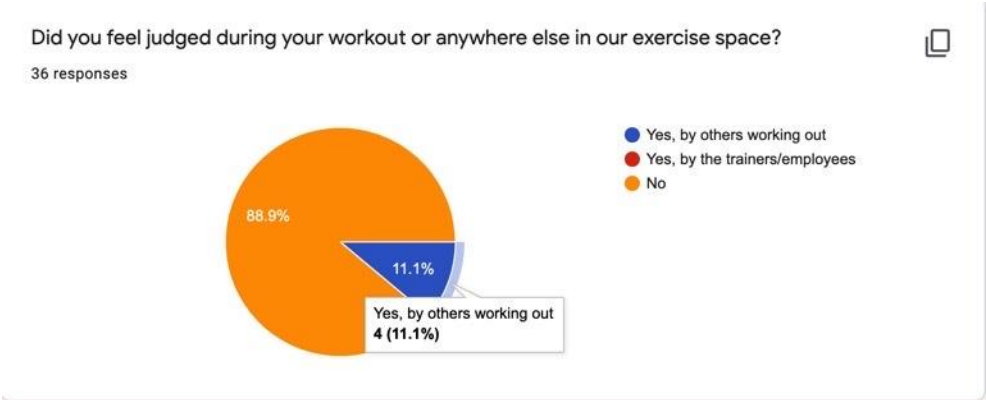
The second need, functionality, was identified by individuals who struggled to use the QR codes in the initial test. An end user shared her experience, “none of the QR codes worked for me and a couple other people I talked to.” This technological complication detracted from the overall experience and could have been avoided with a practice run-through prior to our test date.

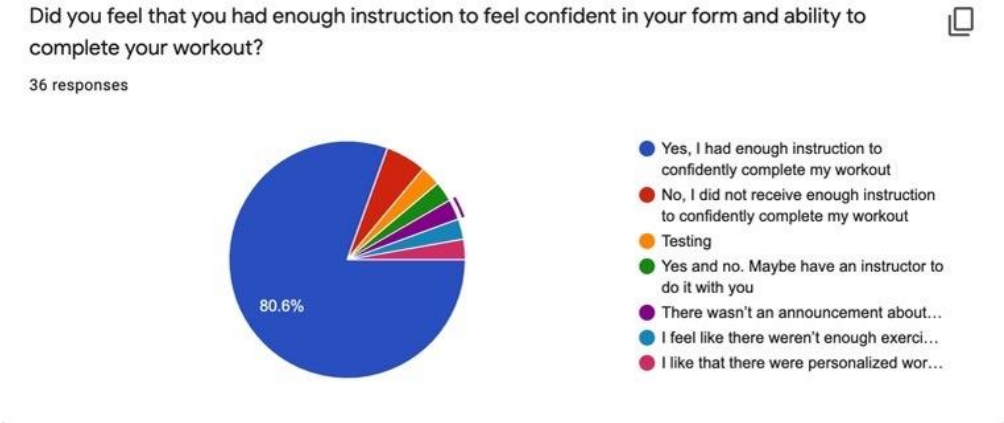
The final need, inclusion, became a focus in our new design because many participants wanted a greater sense of community in their exercise experience. In the Google Form, 10% of participants reported that they felt judged by their peers during the workout, which made it difficult for them to focus on their progress. At the end of the survey, one response stated “stop showing pictures of a specific female body” because she felt that the exercise space highlighted a single body type. Participants wanted a workout space where they could feel camaraderie and belonging. These concerns led our group to modify the original test design to meet our participants' needs.

Artifact 1: Feedback Survey Results









Define

The empathy data we gathered after initial testing helped us create a stronger and more foundational POV statement. Our original POV failed to acknowledge the main reason exercise is so important: it strengthens our physical and mental health. Our bodies were created to move and must be physically reinforced to sustain wellness. When they neglect them, they not only

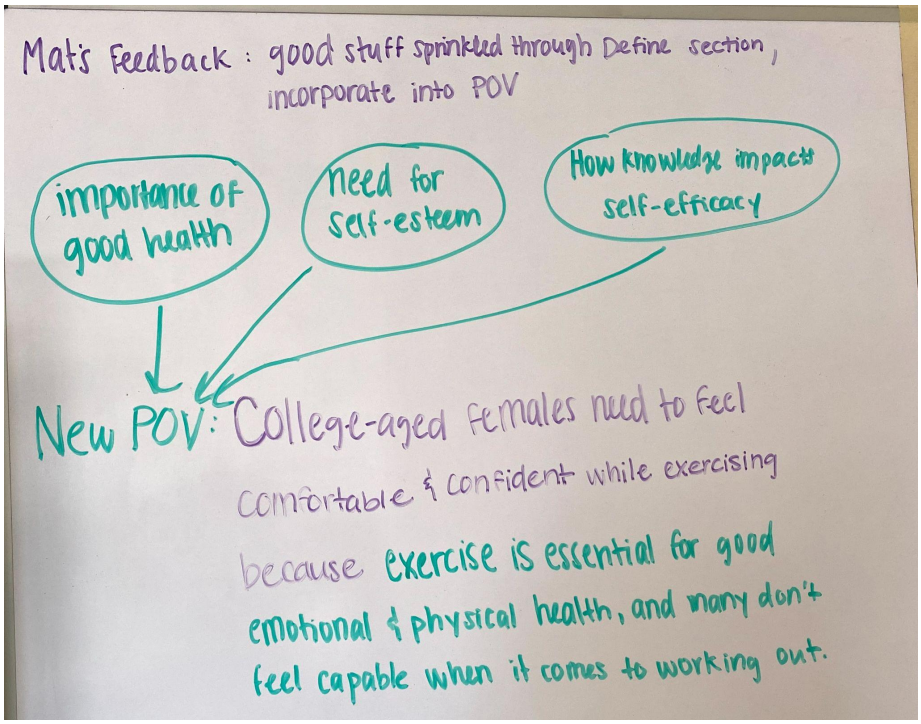
damage their immune systems and energy levels, but also their mental health and confidence. A sedentary lifestyle can lead to changes in attitude, self-esteem, way of thinking, mental energy, and sometimes lead to illnesses like anxiety and depression.

The negative effects of poor exercise create a vicious cycle for many women. They want to work out, but feel anxious about going to a gym because of their insufficient knowledge of proper exercises and technique. If they decide to go, much of their active time is spent worrying about appearing silly, resulting in a poor experience. Often that leads to an absence from the gym for a period of time, which only adds to confidence struggles. The need to feel educated, comfortable, and confident is necessary for women to achieve the fitness goals they want.

This leads us into another revision we made to our POV. Much of our empathy data communicated that more instruction and clarity was needed for the participants to feel confident. Many self-esteem issues surrounding the gym come from not knowing what to do, how many times to do it, and the proper technique to achieve maximum results. Our initial testing did not focus enough on the instruction portion of the experience, causing confusion and nervousness. The participants needed to feel empowered to move their bodies in a productive way that would bring assurance, confidence, and desired results.

Our revised POV statement is as follows: *College-aged females need to feel comfortable and confident while exercising because exercise is essential for good emotional and physical health, and many do not feel capable when it comes to working out.* The need to feel safe and self-assured in an exercise space is further understood when we recognize the impact that wellness and competence have on self-esteem.

Artifact 2: Development of new POV



Ideate

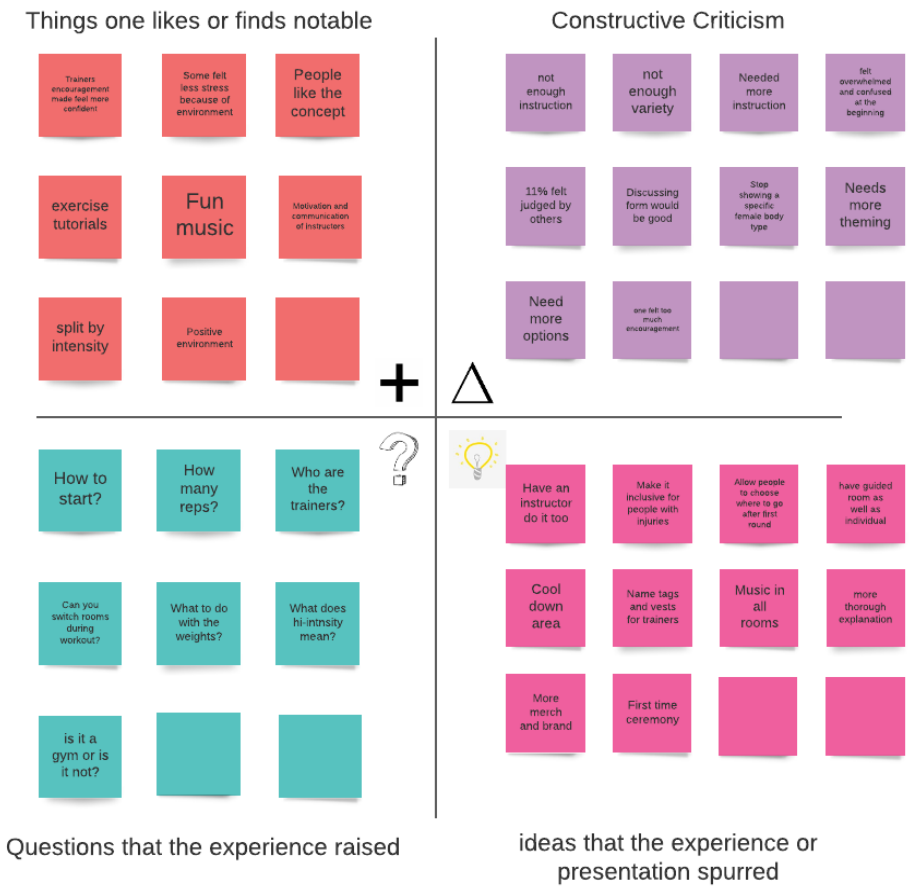
Our group's second round of our ideation phase came after we redefined our problem and reassessed our user group and needs based on our feedback. We shifted our POV statement based on that same feedback, and adjusted the experience to match it. We gathered as a group and brainstormed new ideas or changes we wanted to implement based on the keep, stop and start section of our survey feedback. This showed us what people liked, did not like, or felt was missing, which sparked new ideas and insights for us as a group. We decided to have every member of the group participate in the video guides to showcase a variety of female bodies. We also decided to offer a wider variety of workouts in each intensity room. We wanted to have more decor on the walls and in the rooms creating a more inviting environment. With the increased time limit, we decided to include a check-in process with the manager/gym owner greeting the customers.

Outside of class, we collaborated on a shared LucidSpark ideation feedback capture grid. We took the feedback from the survey and sorted it into the different categories: notable finds, constructive criticism, questions raised, spurred ideas. This helped us think of many new ideas which could be implemented in our next round of testing. Some of these ideas included instructors participating in the workout *with* users, a cooldown routine, entrance wristbands, more uniform clothing for trainers, and more flexibility in selecting rooms.

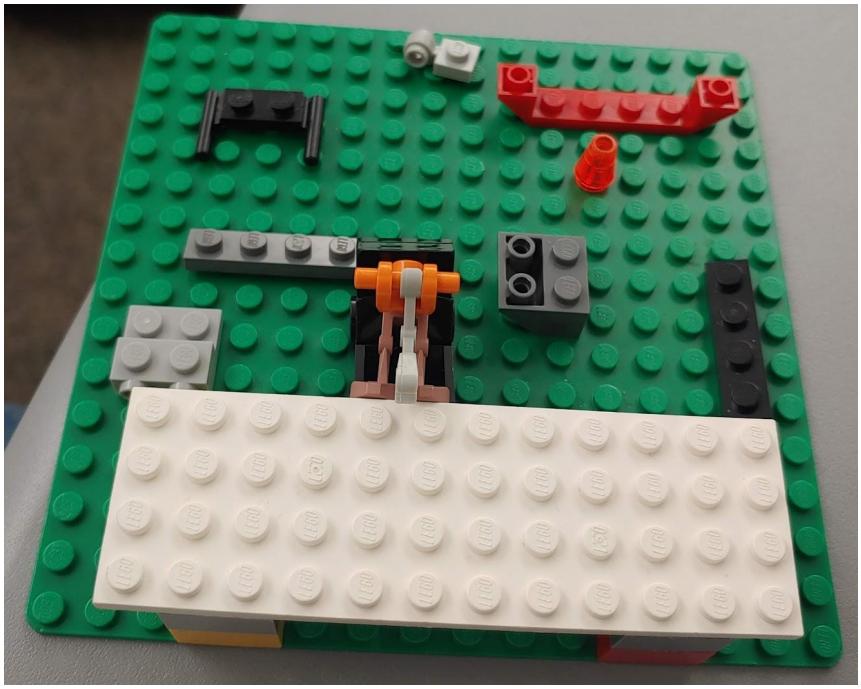
To converge ideas, we discussed which ideas stuck out to us and would positively impact the experience. We picked ideas that best fit the perceived needs of our users. We also made a LEGO model showcasing some of the ideas, such as warm-ups, helping us to better imagine how we could incorporate the idea into the experience. Additionally, as we filled out the Hero's Journey Template, we identified several touchpoints leading to more insights on how to implement the ideas. We also mapped out the entire experience on the classroom whiteboard, ensuring the micro elements cohesively fit into the macro experience. This helped us better envision how the ideas would work together creating a positive experience.

Ultimately, through our brainstorms and discussions, we decided to implement a warm up with get-to-know you questions. We will also offer a group cool down. All of the employees will wear name tags and color coordinated outfits. The video guides will offer a variety of workouts shown by several females in order to highlight different body types. Trainers may participate in the workouts with guests. There will also be a check-in desk, and guests will be encouraged to switch rooms at any time. These ideas fit the needs of our guests addressing their emotional and physical well-being. With these changes we are striving to help each guest feel comfortable and confident, something we aim to accomplish with the WKB.

Artifact 3: Ideation Feedback Capture Grid



Artifact 4: LEGO model of warm-ups



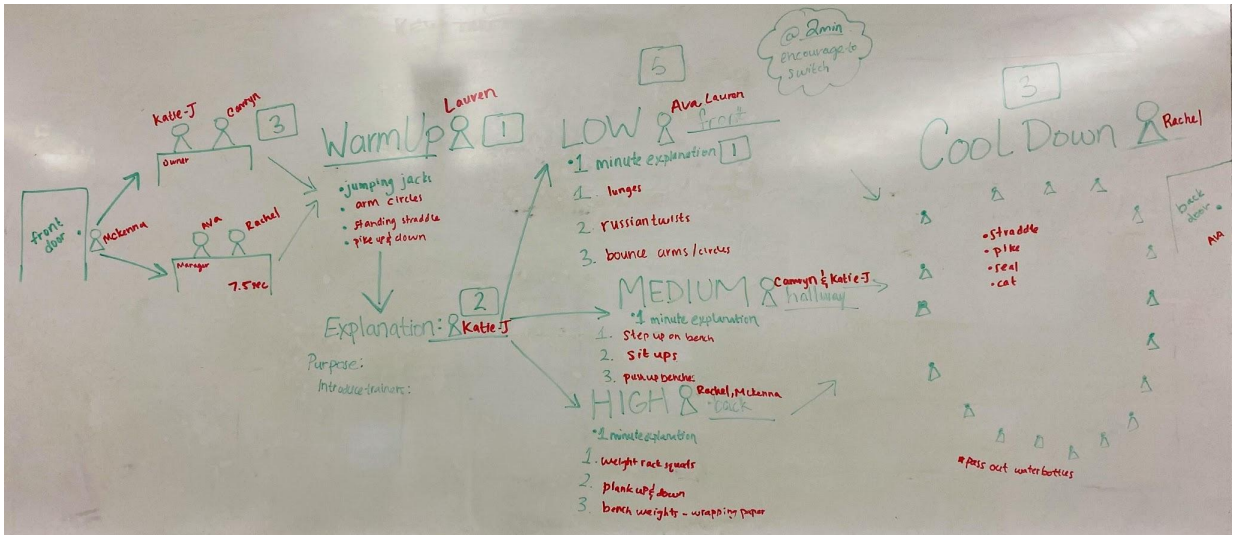
Experience Narrative

You are a college-aged female with an interest in working out. You lack confidence when inside gyms, however, you see a poster about a new exercise space designed for women, by women and are ready to try it out. You walk in and the manager welcomes you as you are checking in and hands you a wristband. You join the other guests in a group warm-up while you wait for the gym introduction. As you warm-up you answer the questions posed by the trainer with your neighbors. The owner then gets up and gives a brief overview of the space and explains the layout and structure of the experience. Each trainer introduces themselves.

You decide you want to follow Ava to the low intensity room. At this point in the experience participants could choose the medium or high intensity options. After hearing Ava explain the different exercise options and watching the workout tutorials on the screen, you decide you want to work on your legs and begin to participate in the lunges. After several minutes you decide that this is really easy and are ready to try a harder leg workout so you move to the medium intensity workout room. At this point participants can choose between legs, arms, or ab workouts. They can also decide if they want to switch rooms. In the medium intensity room you decide to scan the QR code on the wall to read a more in-depth explanation of the step up workout before you start doing it.

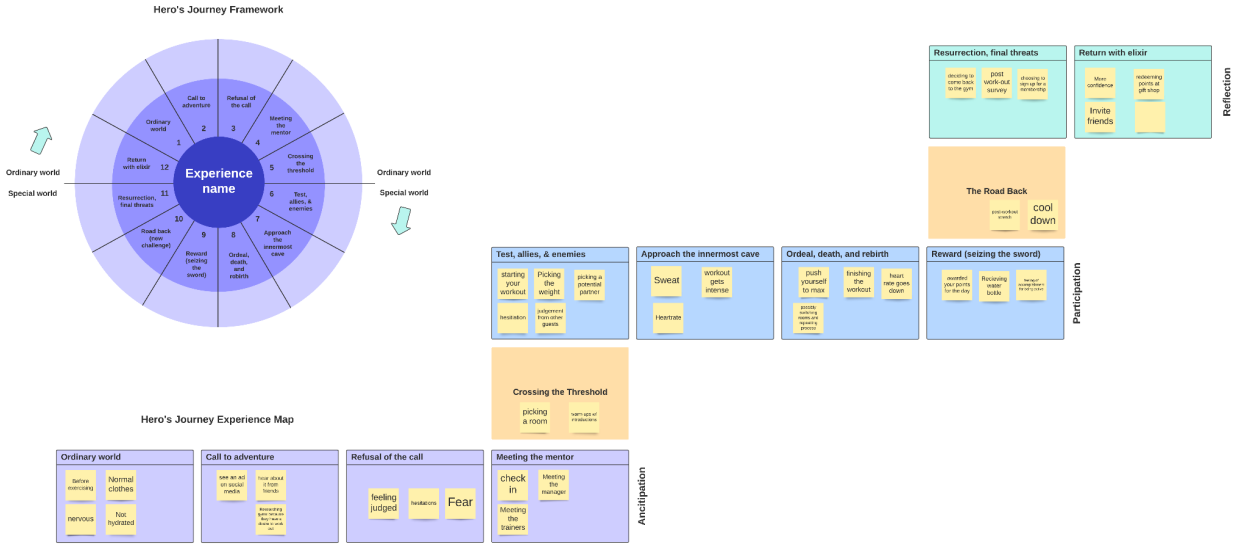
The trainers then say the time is up for your workout session and invite you to head back to the main room. You follow Rachel as she leads the group in a yoga inspired cool down. One of the other trainers hands you a water bottle as a thank you for participating. After a few minutes of yoga you are ready to leave, but are excited to come back again soon.

Artifact 5: The exercise experience mapped out on the whiteboard with assigned roles and time breakdowns.



Hero's Journey Chart

Artifact 6: Hero’s Journey Framework

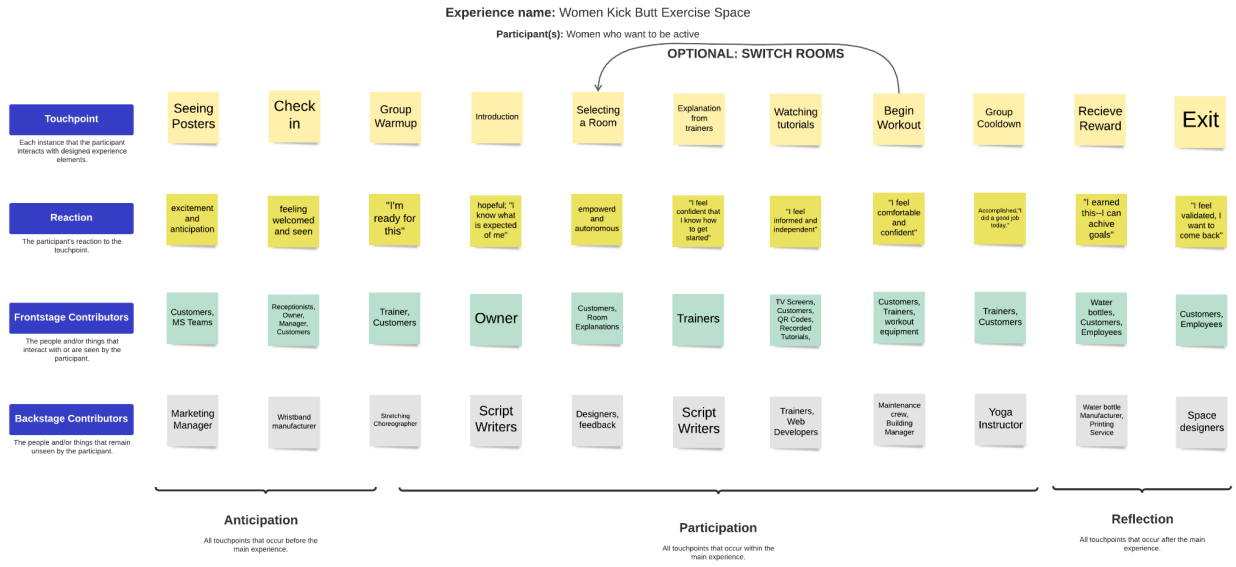


The Hero’s Journey chart proved to be quite influential to our exercise facility. The chart shows the guests' story from before they even enter the gym until when they leave. The guest is coming from their daily life to a new experience that will hopefully teach them something new and allow them to have an altering experience. The next step that influences the participant is

refusal of the call. The user may feel judged or hesitant which resembles this step in the hero's journey. Once they pick a room they cross the threshold leaving the ordinary world and entering the special world. Meeting the mentor helps them progress into the next step. They meet the trainers and recognize they are not on their own and they can complete this task.

While in the special world they face many challenges. The test, and approach is the process of choosing workouts and rooms. The ordeal occurs as the guests begin the most challenging part of their workout. As they push themselves past their breaking point they are reborn. They have accomplished the workout and have new abilities and a new perspective on themselves. This is the knowledge they take with them as they cross the threshold and reenter the ordinary world. They join the other guests and begin cooling down having the opportunity to reflect on all they accomplished. They also receive the water bottle as a reward and are excited to start the process over again soon. The participant will leave with more confidence.

Experience Map



Touchpoint Templates

Touchpoint Template #: 1 **Title**: Seeing the Invitation Posters **Exp. Type** (circle): Pr. Mind. Mem. Mean. Transf.
What type of experience do you want this touchpoint to be?

Desired Reaction: Excitement/Anticipation
What do you want your end users to say as a result of this touchpoint?

1. Desired Results
What should happen to your end users?

1. They should feel excited to come to the exercise space.
2. Participants have an idea of which intensity they will choose on the day of testing

2. Designed Interactions
How will you intentionally orchestrate the elements?

1. We will submit a flyer to a common space (Microsoft teams) for all participants to have the opportunity to see it
2. Different intensity levels with their assigned workouts to help participants get an idea of their experience

3. Experiencescape Elements
What are the key elements for this touchpoint?

Key Elements	Specify
☑ People	participants
☑ Place	MS Teams interface
☑ Objects	virtual flyer
☐ Rules	_____
☐ Relationships	_____
☐ Blocking	_____

4. Contributors
Who and what will make it happen?

Front Stage	Backstage
Customers, MS Teams	Marketing Manager

5. Co-Creation
What will participants do?

High
Details: Participants _will evaluate the _intensity level_ __options to get__ _an idea of their___ _experience___
Low

6. Enhancements
How will you enhance the touchpoint?

Technical	Artistic
1. communication with the guests	1. __customizing_ exercise experience
2. _____	2. _____
3. _____	3. _____

7. Transition
How will end users get to the next touchpoint?

☑ Implicit (no action needed)
☐ Explicit

Result: _N/A
Designed Interaction: __No action needed

Touchpoint Template #: 2 **Title**: Check-In **Exp. Type** (circle): Pr. Mind. Mem. Mean. Transf.
What type of experience do you want this touchpoint to be?

Desired Reaction: Feeling Welcomed and Seen

1. Desired Results
What should happen to your end users?

1. They feel included and welcome
2. They feel excitement and a personal connection with the manager
3. They feel they are an official member with their wristbands

2. Designed Interactions
How will you intentionally orchestrate the elements?

1. Participants will meet with a manager or the owner of the gym to check-in
2. Employees will place a wristband on the participant to help them feel like they part of the group

3. Experiencescape Elements
What are the key elements for this touchpoint?

Key Elements	Specify
☑ People	participants/employees
☑ Place	check-in desk
☑ Objects	wristbands
☐ Rules	_____
☑ Relationships	with owner/employees
☑ Blocking	approach to desk

4. Contributors
Who and what will make it happen?

Front Stage	Backstage
Receptionists, Owner, Manager, Customers	Wristband Manufacturer

5. Co-Creation
What will participants do?

High
Details: participants will be engaged with workout space employees _____
Low

6. Enhancements
How will you enhance the touchpoint?

Technical	Artistic
1. courtesy- guests know Employees/who to contact	1. Characterizing- a feeling of unity and Friendliness is brought

7. Transition
How will end users get to the next touchpoint?

☐ Implicit (no action needed)
☑ Explicit

Result: participants feel ready to get working out
Designed Interaction: employees guide participants to a space to begin a warm-up

Touchpoint Template #: 3 **Title**: Warm-Up

Exp. Type (circle): Pr. Mind. Mem. Mean. Transf.
What type of experience do you want this touchpoint to be?

Desired Reaction: I'm Ready for This
What do you want your end users to say as a result of this touchpoint?

1. Desired Results
What should happen to your end users?

1. Developing friendships with trainers and other participants
2. Building up anticipation for actual workout
3. Feeling familiar and comfortable in workout space

2. Designed Interactions
How will you intentionally orchestrate the elements?

1. Participants will be gathered together to warm-up their muscles and get to know each other
2. Warm-up instructor will assign prompts for participants to get to know each other while they warm-up

3. Experiencescape Elements
What are the key elements for this touchpoint?

Key Elements	Specify
☑ People	participants/warm-up instructor
☐ Place	_____
☐ Objects	_____
☑ Rules	specific warm-up exercises
☑ Relationships	with other participants
☐ Blocking	_____

4. Contributors
Who and what will make it happen?

Front Stage	Backstage
Trainer, Customers	Stretching Choreographer

5. Co-Creation
What will participants do?

High
Details: Participants will warm-up while getting to know other guests
_____
Low

6. Enhancements
How will you enhance the touchpoint?

Technical	Artistic
1. Reliability- Warm-up instructor Builds confidence in Workout space	1. Experience Deepening- building friendships with other guests
2. competence- Warm-up instructor Show cases knowledge	2. Characterizing- Instructor is on brand with KBB

7. Transition
How will end users get to the next touchpoint?

☐ Implicit (no action needed)
☑ Explicit

Result: _participants are prepared to be introduced to the KBB workout space's mission statement

Designed Interaction: participants are guided to a common area

Touchpoint Template #: 4 **Title**: Introduction

Exp. Type (circle): Pr. Mind. Mem. Mean. Transf.
What type of experience do you want this touchpoint to be?

Desired Reaction: I know what is expected of me/hopeful
What do you want your end users to say as a result of this touchpoint?

1. Desired Results
What should happen to your end users?

1. Feeling a sense of belonging and unity in purpose
2. Gaining knowledge of workers
3. Feeling comfortable navigating the exercise space

2. Designed Interactions
How will you intentionally orchestrate the elements?

1. The owner will present the motivation for creating the workout space
2. A Powerpoint will give a visual aid

3. Experiencescape Elements
What are the key elements for this touchpoint?

Key Elements	Specify
☑ People	Trainers
☐ Place	_____
☑ Objects	Powerpoints
☐ Rules	_____
☐ Relationships	_____
☐ Blocking	_____

4. Contributors
Who and what will make it happen?

Front Stage	Backstage
Owner	Script Writers

5. Co-Creation
What will participants do?

High
Details: Participants will feel Inspired by the Purpose of the KBB
Low

6. Enhancements
How will you enhance the touchpoint?

Technical	Artistic
1. Credibility- the Workout space Owner will gain Confidence through Their mission statement	1. Empathy- Participants feel Seen and connected To the space
	2. Memorializing- The space is dedicated To women's goals

7. Transition
How will end users get to the next touchpoint?

☑ Implicit (no action needed)
☐ Explicit

Result: N/A

Designed Interaction: No action needed

Touchpoint Template #: 5 **Title**: Selecting a Room **Exp. Type** (circle): Pr. Mind. Mem. Mean. Transf.
What type of experience do you want this touchpoint to be?

Desired Reaction: Empowered/Autonomous
What do you want your end users to say as a result of this touchpoint?

1. Desired Results
What should happen to your end users?

1. They choose a room that they feel fits their exercise level that day

2. Designed Interactions
How will you intentionally orchestrate the elements?

1. Different intensity level stations will be labeled and employees will be available to guide them to the space

3. Experiencescape Elements
What are the key elements for this touchpoint?

Key Elements	Specify
☑ People	employees/participants
☑ Place	different intensity levels
☑ Objects	posters labeling different intensity areas
☐ Rules	_____
☐ Relationships	_____
☑ Blocking	participants can be guided if they are lost

4. Contributors
Who and what will make it happen?

Front Stage	Backstage
Customers, Room Explanations	Designers, Feedback

5. Co-Creation
What will participants do?

High
Details: participants Will have complete autonomy to Choose a personal Workout for themselves
Low

6. Enhancements
How will you enhance the touchpoint?

Technical	Artistic
1. responsiveness- employees will Look for lost participants	1. customizing- different intensity Rooms will Accommodate Different guests

7. Transition
How will end users get to the next touchpoint?

☐ Implicit (no action needed)
☑ Explicit

Result: participants will be able to identify their assigned trainer for their rooms

Designed Interaction: trainers will be prepared to receive and welcome their guests in their intensity rooms

Touchpoint Template #: 6 **Title**: Explanations from Trainers **Exp. Type** (circle): Pr. Mind. Mem. Mean. Transf.
What type of experience do you want this touchpoint to be?

Desired Reaction: I feel confident that I know how to get started
What do you want your end users to say as a result of this touchpoint?

1. Desired Results
What should happen to your end users?

1. The workouts are clearly laid out and they know their resources
2. They feel their trainers are reliable and approachable

2. Designed Interactions
How will you intentionally orchestrate the elements?

1. The trainers will have an idea of the scripted instructions
2. Trainers will demonstrate the exercises

3. Experiencescape Elements
What are the key elements for this touchpoint?

Key Elements	Specify
☑ People	Trainers and guests
☐ Place	_____
☑ Objects	weights if applicable
☑ Rules	understood set routine
☐ Relationships	_____
☑ Blocking	explanations before exercises

4. Contributors
Who and what will make it happen?

Front Stage	Backstage
Trainers	Script Writers

5. Co-Creation
What will participants do?

High
Details:participants Will learn their Workout routines From the trainers
Low

6. Enhancements
How will you enhance the touchpoint?

Technical	Artistic
1. communication- trainers will be prepared to direct Guests to their stations	1. Characterizing- Trainers are seen As confidants 2. Customizing- participants feel their exercise plan is unique to them

7. Transition
How will end users get to the next touchpoint?

☑ Implicit (no action needed)
☐ Explicit

Result: N/A

Designed Interaction: No action needed

Touchpoint Template #: 7 **Title**: Watching Tutorials **Exp. Type** (circle): Pr. Mind. Mem. Mean. Transf.
What type of experience do you want this touchpoint to be?

Desired Reaction: Informed and Independent
What do you want your end users to say as a result of this touchpoint?

1. Desired Results
What should happen to your end users?

1. Participants feel they have a resource that explains their routine without consulting anyone
2. Participants are confident in their independence while at the exercise space

2. Designed Interactions
How will you intentionally orchestrate the elements?

1. Laptops will be set up with Gifs to resemble TV screens at the workout space

3. Experiencescape Elements
What are the key elements for this touchpoint?

Key Elements	Specify
☐ People	_____
☐ Place	_____
☑ Objects	Laptops with Gifs
☐ Rules	_____
☐ Relationships	_____
☐ Blocking	_____

4. Contributors
Who and what will make it happen?

Front Stage	Backstage
TV Screens, Customers, QR Codes, Recorded Tutorials	Trainers, Web Developers

5. Co-Creation
What will participants do?

High
Details: participants will follow tutorials if necessary
Low

6. Enhancements
How will you enhance the touchpoint?

Technical	Artistic
1. Competence- participants will Know the space Cares for their comfort	1. Experience Deepening- participants can stay In flow since they Have independence

7. Transition
How will end users get to the next touchpoint?

☐ Implicit (no action needed)
☑ Explicit

Result: Participants will begin working out
Designed Interaction: Trainers will begin exercising with participants to encourage the start of the routine

Touchpoint Template #: 8 **Title**: Begin Workout **Exp. Type** (circle): Pr. Mind. Mem. Mean. Transf.
What type of experience do you want this touchpoint to be?

Desired Reaction: I feel comfortable and confident in this exercise space
What do you want your end users to say as a result of this touchpoint?

1. Desired Results
What should happen to your end users?

1. Participants will begin working out and are comfortable in the space

2. Designed Interactions
How will you intentionally orchestrate the elements?

1. Trainers are providing direction and positive reinforcement

3. Experiencescape Elements
What are the key elements for this touchpoint?

Key Elements	Specify
☑ People	Trainers
☑ Place	Different intensity rooms
☐ Objects	_____
☐ Rules	_____
☐ Relationships	_____
☐ Blocking	_____

4. Contributors
Who and what will make it happen?

Front Stage	Backstage
Customers, Trainers, Workout Equipment	Maintenance crew, Building Manager

5. Co-Creation
What will participants do?

High
Details: participants will workout at their own pace
Low

6. Enhancements
How will you enhance the touchpoint?

Technical	Artistic
1. Reliability- trainers provide Guidance and Encouragement	1. Empathy- trainers help Participants feel Comfortable and secure

7. Transition
How will end users get to the next touchpoint?

☐ Implicit (no action needed)
☑ Explicit

Result: Participants are gathered in one area to cool down together
Designed Interaction: Trainers will guide participants to the are with the cool down instructor

Touchpoint Template #: 9 **Title**: Group Cool Down **Exp. Type** (circle): Pr. Mind. Mem. Mean. Transf.
What type of experience do you want this touchpoint to be?

Desired Reaction: I feel accomplished/ I did a good job today
What do you want your end users to say as a result of this touchpoint?

1. Desired Results
What should happen to your end users?

1. Participants feel the comradery of the exercise space
2. Participants are able to wind down from their exercise and feel connected to their bodies

2. Designed Interactions
How will you intentionally orchestrate the elements?

1. Cool Down instructor will have a routine planned and scripted

3. Experiencescape Elements
What are the key elements for this touchpoint?

Key Elements	Specify
☑ People	Cool Down Instructor
☑ Place	Cool down area
☐ Objects	_____
☐ Rules	_____
☑ Relationships	friendships with other participants
☐ Blocking	_____

4. Contributors
Who and what will make it happen?

Front Stage	Backstage
Trainers, Customers	Yoga Instructor

5. Co-Creation
What will participants do?

High
Details: Cool Down instructor guides the group, but participants make the friends
Low

6. Enhancements
How will you enhance the touchpoint?

Technical	Artistic
1. Communication- Cool down instructor is clear	1. Characterizing- Cool down instructor Helps participants Connect with their Inner minds through prompts
2. Reliability- trainers will help Participants who are lost	

7. Transition
How will end users get to the next touchpoint?

☑ Implicit (no action needed)
☐ Explicit

Result: N/A

Designed Interaction: No action needed

Touchpoint Template #: 10 **Title**: Receive Reward Water Bottle **Exp. Type** (circle): Pr. Mind. Mem. Mean. Transf.
What type of experience do you want this touchpoint to be?

Desired Reaction: I earned this! I can achieve goals
What do you want your end users to say as a result of this touchpoint?

1. Desired Results
What should happen to your end users?

1. Participants will feel excited they received points from attending the exercise space

2. Designed Interactions
How will you intentionally orchestrate the elements?

1. Trainers will walk around with reward water bottles/QR codes

3. Experiencescape Elements
What are the key elements for this touchpoint?

Key Elements	Specify
☑ People	trainers
☐ Place	_____
☑ Objects	Water bottles
☐ Rules	_____
☐ Relationships	_____
☐ Blocking	_____

4. Contributors
Who and what will make it happen?

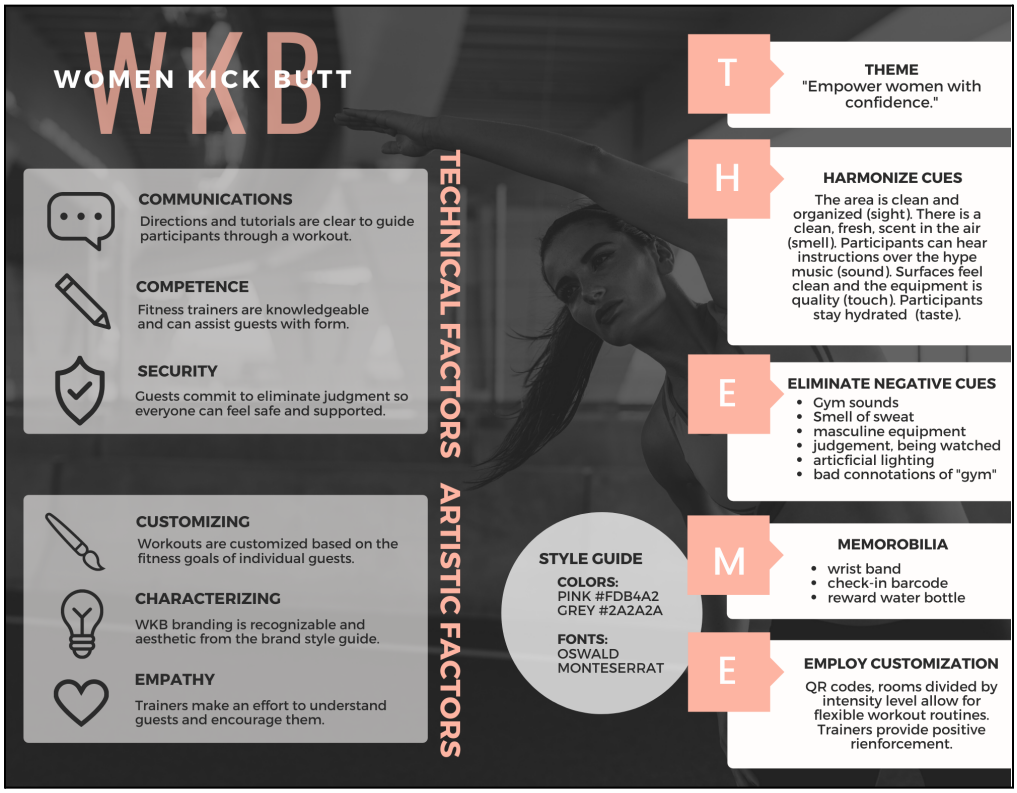
☐ Explicit

Result: N/A

Designed Interaction: No action needed

Brand Experience Guide

Artifact 7: Brand Experience Guide



We developed our Brand Experience Guide by pinpointing what we want our exercise experience to communicate. College-aged females need our facility to be a place where they feel comfortable and confident. It should give them clarity to strengthen their physical and emotional wellness. We want our gym to not only be a safehouse for these women, but also to give them the courage and skills they need to conquer whatever comes their way. To capture this “kick-butt” attitude, we came up with the theme “Empower Women with Confidence”. This statement helped guide us in knowing what improvements to specific elements of the experience we needed to focus on.

Our exercise space is characterized by cleanliness, inclusivity, encouragement, and femininity. We want women to embrace their journey, and feel empowered by the trainers. Our goal is to have guests love themselves as they achieve their own goals. We want WKB to be noted for its fun environment, the focus on creating relationships, positive affirmation, and a unique workout experience. We are not a typical gym, and that is what defines our business.
